MAP Technical Board Meeting
December 3, 2010

Review Process

- Proposals involving MAP resources should be submitted to Program Director for decision
- Technical Board will serve to assess proposals (from any source) on:
 - technical merits (could it be improved?)
 - required level of MAP commitment
 - effort, duration, costs
 - priority compared with other activities
- Program Director will use TB input, among other things, in deciding course of action
 - proceed with proposal, request changes, reject it

Note

- Today will be the first application of this approach
- This—or some appropriate variant—should be followed for all “external” requests for MAP resources
