

Wrap-up

- The **MC** is vigorous and enthusiastic
 - grass-roots effort of both particle and accelerator physicists
- Participation of **NSF institutions** (Universities \Rightarrow **students**) strengthens effort
 - interest and involvement of **international groups** is growing
- **MC** strongly supports U.S. HEP **maintaining its significant presence in the exciting neutrino physics sector**
- We hope the Subpanel will support these positive trends
 - requires **strong future investment in accelerator R&D activities**
 - **increased accelerator R&D \Rightarrow increased future options for HEP community**
- At Snowmass '01 **MC** will provide information to permit HEP community to **consider and evaluate the physics potential of intense muon beams**
